Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

Other Site Characteristics

La mayor parte de este espacio está ocupada por terrenos de cultivo, con áreas en barbecho o abandonadas y pequeños bosques inmersos, que constituyen uno de los valores más interesantes para las poblaciones de aves esteparias de la zona.

4.2 Quality and importance

Entre los objetivos de conservación de este espacio, detallados en el Apartado 3, cabe destacar, en especial la ganga ortega (A420) y el cernícalo primilla (A095). En el primer caso, constituye la principal zona de invernada de la especie mientras que, en el caso del cernícalo primilla, en este espacio se encuentra más del 70% de la población catalana. Este espacio alberga, también, una parte muy importante de la población catalana de calandria (A242) y carraca (A231). En cuanto a hábitats de interés comunitario, en este espacio se localizan importantes enclaves de vegetación gipsícola (1520).
