S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

Other Site Characteristics

Espacio situado en la solana de la comarca de la Cerdanya, muy proximo al fondo del valle. Su ubicación corresponde a parte baja de la ladera de un valle pirenaico. En estas partes bajas es donde el clima, aunque con marcado carácter continental, tiene un importante componente mediterráneo, que permite en estas zonas la presencia de sistemas naturales y especies claramente mediterráneos, que penetran de esta manera en el territorio alpino.

4.2 Quality and importance

Hay que destacar de este espacio el interés biogeográfico que tiene, al ser un buen representante de hábitats de tipo mediterráneo en la región alpina. Estos hábitats mediterráneos llegan a la región alpina a través del fondo de los valles, originando en algunas zonas microambientes muy particulares y variantes singulares y biogeográficamente significativas de hábitats típicamente mediterráneos. También hay que destacar que se trata de una espacio importante para la representación de determinadas especies, sobretodo de Gypaetus barbatus.
