- Producción sistemática de composiciones espaciales y temporal de observaciones globales sistemáticas.
- Producción de variables bio-geofísicos terrestres a escala global y continental
- Reprocesamiento de datos históricos para nuevo análisis y anual entre comparaciones

# ❖ Servicio Copernicus Land Global

## From medium to high resolution

Theme	Variable	Spatial Resolution
Vegetation	Land Cover	Moderate 100m
		In production

## Non-gridded products

Theme	Variable	Rivers and Lakes
Water	Water Level	In production

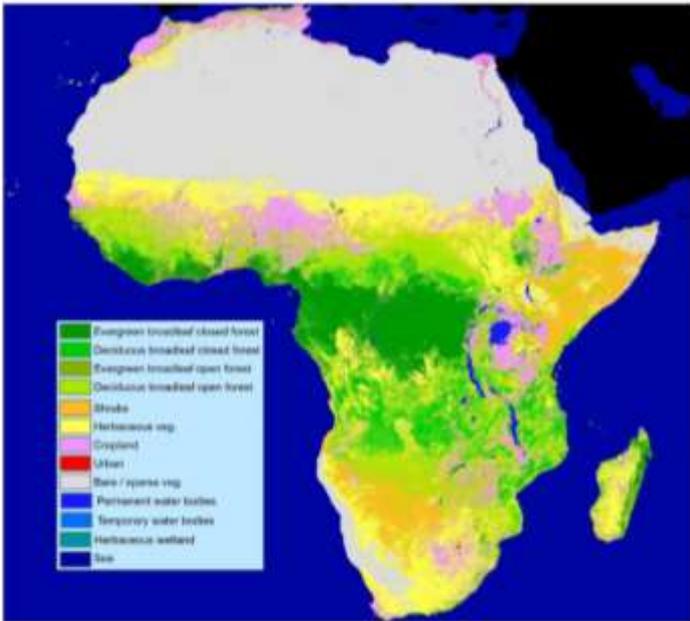

Figure 2: The CGLS Dynamic Land Cover Map at 100 m for Africa 2015 (shown at continental scale).

# ❖ Servicio Copernicus Land Global

## From coarse to medium resolution

Theme	Variable	Spatial Resolution	
		Coarse ≥1km	Medium 300m
Vegetation	Fraction of photosynthetically active radiation absorbed by the vegetation	In production	In production
	Fraction of green vegetation cover	In production	In production
	<u>Leaf Area index</u>	In production	In production
	Normalized Difference Vegetation Index	In production	In production
	Vegetation Condition Index	In production	
	Vegetation Productivity Index	In production	
	Dry Matter Productivity	In production	In development
	Burnt Area	In production	In production
	Soil Water Index	In production	
	Surface Soil Moisture	In development	
Energy	Land Surface Temperature	In production	
	Top Of Canopy Reflectance	In development	In development
	Surface Albedo	In development	In development
	Downward Short- and Longwave Fluxes at the surface	In development	
Water	Water Bodies	In production	In production
	Lake Surface Water Temperature	In development	
	Lake Water Quality (reflectance, turbidity, trophic state)	In development	
Cryosphere	Lake Ice Extent	In development	
	Snow Cover Extent	In development	
	Snow Water Equivalent	In development	

# ❖ Servicio Copernicus Land Global

The screenshot shows the Copernicus Global Land Service website. At the top, there is a browser address bar with the URL `land.copernicus.vgt.vito.be/PDF/portal/Application.html#Home`. The main header features the Copernicus logo and navigation links for Login, Help, Register, FAQ, and Contact. Below the header, the page is organized into two main sections: "Vegetation State" and "Energy Budget".

**Vegetation State**

- VEGETATION PROPERTIES**: Includes a world map showing vegetation indices and a "Collections" link.
- VEGETATION INDICATORS**: Includes a world map showing vegetation indicators and a "Collections" link.
- BIOMASS**: Includes a world map showing biomass distribution and a "Collections" link.
- FIRE DISTURBANCE**: Includes a world map showing fire disturbance and a "Collections" link.
- DYNAMIC LAND COVER**: Includes a map of Africa showing land cover changes and a "Collections" link.
- SOIL WATER**: Includes a world map showing soil water content and a "Collections" link.

**Energy Budget**

- TOP OF CANOPY REFLECTANCE**: Includes a world map showing reflectance and a "Collections" link.
- ALBEDO**: Includes a world map showing albedo and a "Collections" link.
- LAND SURFACE TEMPERATURE**: Includes a world map showing land surface temperature and a "Collections" link.

At the bottom of the page, there are links for "About us", "Terms of use", and "Feedback". The footer includes the Creative Commons Attribution (CC BY) license logo, the version number "Version 2.1.15-20161004", and logos for VITO and the Spanish National Geographic Institute (IGN).

Wetlands	51.2% ± 2.94	47.2% ± 2.97	SIOSE, BTN100

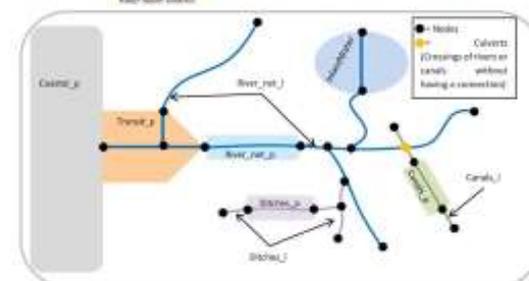

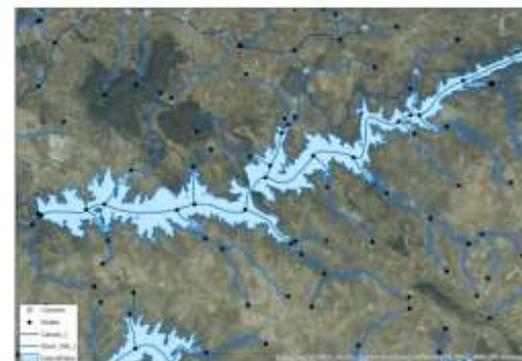

## EU-DEM 2015

- ★ Pixel resolution: 25 meters
- ★ Vertical accuracy of +/- 7 meters RMSE
- ★ Projection: LLAEA (EPSG:3035); ellipsoid GRS80, vert. datum EVRS2000 geoid EGG08
- ★ Source datasets: SRTM, ASTER GDEM and Russian topographic maps
- ★ Delivery format: GeoTIFF 32 bit, 100x100 km tiles
- ★ More than 75.000 artifacts detected and corrected
- ★ Consistency with the EU-HYDRO coastline
- ★ Burning EU-HYDRO water bodies into EU-DEM
- ★ QC: statistical analysis, removal of artifacts & geo-positioning errors, consistency with EU-HYDRO, completeness

- ★ River Network scale: 1:50,000 and better
- ★ Projection: Lambert Azimuthal Equal-Area (EPSG:3035); geographic CRS – ETRS89
- ★ MMU: 1 ha: photo-interpretation VHR SPOT5/6 imagery (2.5 m res.), period 2011-2013
- ★ River network: rivers (l/p), inland water bodies (p), culverts (l), nodes, canals (l/p), ditches (l/p), transitional waters (p), coastal polygon (p), river basins (p)
- ★ QC: positional & thematic accuracy, topological consistency, completeness, INSPIRE conformity

# Servicio Land Local: Urban Atlas
