## I.II. Collaboration

Fields marked with \* need to be filled in before the form can be submitted to the next level.

### I. Application context

#### I.II. Collaboration with other Competent Authorities, the Commission, authorities of third countries or between authorities within a Member State to ensure the implementation and enforcement of the EUTR (ref. EUTR Articles 8(4)), 10(2), 12 and 19(3))

The implementation and enforcement of the EUTR nationally and across implementing countries requires the effective collaboration of different authorities to ensure comprehensive risk based planning of checks and successful enforcement measures.

‘Collaboration’ refers to the **active exchange** (i.e. the reception from and provision to other authorities) of **raw data** (e.g. customs or tax declaration data) or of **more processed information** (e.g. operator names or information on particular risks in countries of origins) that can be used for the planning of checks, performance of ad hoc checks or the coordination of EUTR implementation or enforcement action. It also refers to working together on **joint checks or coordinated implementation or enforcement action**. Collaboration frequency, partners, subjects and related legal constraints serve as indicators for assessing the intensity, quality, and scope of the collaboration.

1 Select the frequency with which the Competent Authority collaborates with other authorities through the **exchange of data/information** to implement and/or enforce the EUTR in relation to the obligations for operators, traders and monitoring organisations (duty-holders):

	Frequently (at least monthly)	Occasionally (less frequently than monthly)	Never

En un Estado Miembro con múltiples Autoridades Competentes, como España, la casuística de colaboraciones es muy variada, pudiéndose dar casi todos los casos. En este apartado, en las preguntas 1 y 4 sólo está permitida una respuesta, por lo que al tener que indicarse sólo una, no puede considerarse un reflejo fiel de la realidad.

Asimismo, en estas preguntas, el intercambio de información y las acciones de implementación pueden ser genéricas, no enfocadas a una tipología específica de agente/comerciante/entidad de supervisión, por lo que no creemos que las respuestas puedan ser analizadas de forma coherente a nivel de la Unión Europea. Entre las acciones de implementación que se han considerado tanto controles conjuntos como acciones de formación, comunicación, y otras.

Asimismo, aunque se consigue intercambio de información con las autoridades aduaneras de forma puntual y ocasional, Aduanas determina que no puede proporcionar datos por temas normativos, específicamente por: artículo 12.1 del Reglamento (UE) nº 952/2013 del Parlamento Europeo y del Consejo, de 9 de octubre de 2013, por el que se establece el código aduanero de la Unión <https://eur-lex.europa.eu/legal-content/ES/TXT/?uri=celex%3A32013R0952>; artículo 95 de la Ley 58/2003, de 17 de diciembre, General Tributaria. <https://www.boe.es/buscar/act.php?id=BOE-A-2003-23186#a34>; artículo 6 del Reglamento (UE) 2016/679 del Parlamento Europeo y del Consejo, de 27 de abril de 2016, relativo a la protección de las personas físicas en lo que respecta al tratamiento de datos personales y a la libre circulación de estos datos <https://eur-lex.europa.eu/legal-content/ES/TXT/?uri=CELEX%3A32016R0679>

#### I.III. Records of checks (ref. EUTR Article 11)

Keeping records of checks is necessary for carrying out effective inspections and enforcement actions, and facilitates check planning and reporting, as well as for giving access to environmental information to the general public or upon request. Data related to checks under the EUTR kept in the records are considered environmental information. As a rule, access to environmental information has to be granted to anyone requesting it, unless this information falls under one of the exceptions to this rule, such as confidentiality of proceedings protected by law, ongoing proceedings, commercial information and personal data.

1 Please specify which of the information on the following duty holders (operators, traders, and monitoring organisations) is not retained in the Competent authorities (CA's) records. Of the information retained, indicate, which is made available under Article 11(2) and Directive 2003/04/EC on access to environmental information, (i.e. when none of the exceptions apply) and in which way:

	This information is <b>not retained</b> in the CA's record	This information is (partially) made publicly available	This information is (partially) made available only upon request	None of this information is made available due to restrictions under the provisions of <b>national legislation</b> going beyond the EU legislation

# I.IV. Alcance, sensibilización y desarrollo de capacidades

Los campos marcados con \* son obligatorios.

## I. Contexto de la solicitud

### I.IV. Alcance, sensibilización y desarrollo de la capacidad de los distintos destinatarios en relación con el EUTR (véase el artículo 13 del EUTR).

Para una aplicación eficaz y eficiente del EUTR, son esenciales la sensibilización y la capacidad de los responsables del cumplimiento (agentes, comerciantes y entidades de supervisión), así como de las personas que participan en la verificación del cumplimiento y la aplicación de la normativa. Asimismo, la sociedad civil, en particular los consumidores, deben ser conscientes del riesgo de que se comercialice madera o productos de la madera procedentes de la tala ilegal, así como de las medidas adoptadas para abordar esta cuestión. El tipo de campaña informativa, junto con el nivel de participación y el tamaño estimado del público destinatario pueden servir para evaluar en qué medida se llega y se sensibiliza al público o su capacidad para cumplir o comprobar el cumplimiento del EUTR.

A efectos de la presentación de informes, se distinguen tres niveles de alcance del público al que va dirigido la campaña:

**Llegar a un público** significa que dicho público recibe la información. Es un primer paso necesario para la sensibilización y puede indicar una posible sensibilización. Sin embargo, la prueba de haber llegado a un público, como la recepción de correos, las visitas a un sitio web o el visionado de una emisión no sirven como prueba de sensibilización.

**Aumentar la sensibilización** de un público significa garantizar que los destinatarios del mensaje lleguen a ser conscientes de un concepto, ya sea el EUTR o una de sus partes, pero sin que sea necesario captarlo plenamente o retener los detalles. Las pruebas de interacción con un público en relación con el EUTR, los intercambios directos de correos electrónicos, los chats o cualquier otra comunicación interactiva pueden considerarse una prueba de la sensibilización. La sensibilización incluye el hecho de haber sido alcanzado por la campaña.

**Desarrollar la capacidad** de un público significa proporcionar o mejorar sus capacidades y conocimientos, permitiendo así al público utilizarlos de forma activa y autónoma. La prueba de la participación en una actividad específica e interactiva dirigida a un público cerrado, como la participación en un curso de formación, seminarios, conferencias o reuniones, puede considerarse una prueba de que se ha logrado el desarrollo de capacidades. El desarrollo de capacidades incluye la sensibilización y, por lo tanto, también llegar a los destinatarios.

Utilice el siguiente formulario para registrar los detalles de acciones, campañas, acontecimientos, emisiones, o comunicados de prensa particulares durante el período de referencia para aumentar la sensibilización del EUTR o la capacidad de aplicarlo. Para cada campaña, rellene un nuevo impreso a lo largo del período de referencia.

1 Descripción o nombre de la acción, campaña, acontecimiento, emisión o comunicado de prensa:

Jornada "Reglamento europeo contra la deforestación EUDR: Aplicación en el sector forestal y su cadena de valor". 26 de febrero de 2025.

\*2 ¿Qué tipos de herramientas de comunicación se utilizaron en este caso para alcanzar, sensibilizar al/los destinatario (s) o desarrollar sus capacidades?

- Cursos de formación, seminarios, conferencias, reuniones (cuentan como desarrollo de capacidades, sensibilización y alcance de los participantes)
- Intercambios directos de correos electrónicos, chats o cualquier otro tipo de comunicación interactiva, contactos en ferias, inspecciones (cuentan como sensibilización y alcance de los participantes)
- Correos electrónicos informativos, boletines, folletos (cuentan como alcance de los destinatarios)
- Sitios web, medios sociales, seminarios web accesibles al público, material informativo descargable (cuentan como alcance de los usuarios contabilizados)
- Televisión, programas de radio (cuentan como alcance del público estimado)

\*3 Especifique el tema (seleccione todas las opciones que procedan):

## I.IV. Reaching, raising awareness and building capacity

Fields marked with \* need to be filled in before the form can be submitted to the next level.

### I. Application context

#### I.IV. Reaching, raising awareness and building capacity of different target audiences regarding EUTR (ref. EUTR Article 13)

For an effective and efficient application of the EUTR, the awareness and capacity of the duty-holders (operators, traders, and monitoring organisations), as well as of those involved in compliance verification and enforcement is crucial. Also civil society, in particular consumers, should be aware of the risk of illegally harvested timber/timber products being placed on the market and of the measures taken to address this issue. The type of information campaign, the level of involvement of the audience and estimated size of the audience can serve to assess, in how far which audience is reached, made aware and/or its capacity to comply with or verify compliance with the EUTR.

For the purpose of reporting, three levels of attaining audiences are differentiated:

**Reaching** an audience means information is being received by that audience. It is a necessary first step of awareness-raising and can indicate possible awareness raising. However, proof of reaching an audience, like reception of mails, visits of a website, viewing of an emission, cannot serve as a proof of awareness raising.

**Raising awareness** of an audience means ensuring that the audience reached becomes conscious of a concept, here the EUTR or one of its components, but not necessarily fully grasping it or retaining the details. Proof of interaction with an audience regarding the EUTR, direct e-mail exchanges, chats or other interactive communication can be considered proof of awareness raising. Awareness raising includes having been reached.

**Building capacity** of an audience means providing or improving skills and knowledge, thus enabling the audience to actively and autonomously use them. Proof of participation in a targeted, interactive activity for a closed audience like participation in a training course, seminars, conferences or meetings can be considered proof that capacity building has been achieved. Capacity building includes awareness raising and thus also reaching the audience.

Please use the form below to record details of particular actions/campaigns/events/emissions/press releases during the reporting period to increase awareness of the EUTR and/or the capacity to apply it. For each campaign fill in a new form throughout the reporting period.

1 Description or name of action/campaign/event/emission/press release:

Campaña recordatorio de obligaciones; presentación Declaración Responsable  
Campaña informativa derogación y prórroga de la derogación del Reglamento  
Envío masivo de correos a los agentes para informar de los cursos o seminarios  
Servicio de consultas de la autoridad competente estatal EUTR a través de teléfono y correo electrónico

En un Estado Miembro con múltiples Autoridades Competentes, como España, la casuística de cómo las Autoridades Competentes pueden tener acceso a instalaciones y documentación es múltiple. Se ha indicado la opción mayoritaria, aunque no puede considerarse un reflejo fiel de la realidad. En cualquier caso, el Real Decreto 1088/2015 especifica que los agentes y comerciantes deberán facilitar a las autoridades competentes la realización de los controles. Sobre los controles a las Entidades de Supervisión, deberán ajustarse en todo caso a lo establecido en el Reglamento de Ejecución 607/2012.

## II.II. Resources

Fields marked with \* need to be filled in before the form can be submitted to the next level.

### II. Verification of compliance - context and implementation

---

#### II.II. Resources for EUTR compliance verification and enforcement

The resources available for the verification of compliance and enforcement are key for ensuring the application of the EUTR and thus the reduction of illegally harvested timber or derived products being placed on the EU market and the improvement of traceability of timber throughout the supply chain in the EU. It is therefore important to understand, how much resources are at the disposal of the authorities implementing the EUTR and how much resources they need per compliance verification check. For a better understanding of the resources needed for compliance verification of operators placing imported timber/timber products, it is also important to understand, whether there are specific countries of harvest or origin, for which the verification of compliance with the EUTR it is particularly complex and thus resource-consuming.

#### Resources available for compliance verification and enforcement

---

Please specify the staff and resources dedicated to EUTR implementation and enforcement over the reporting period. Please **only count staff with a strong focus on EUTR**, not additional support staff or customs staff, unless customs is one of the Competent Authorities.

\*1 **Staff and budgets** dedicated to EUTR implementation and enforcement for **domestic timber** and **imported timber** are:

- Separated  
 Combined

For **domestic and imported timber combined** (including operators, traders and monitoring organisations, if relevant)

\*6 What is **the staff's approximate combined total time** spent on EUTR implementation/ enforcement?

Provide as **full-time equivalents (FTE)**, e.g. 10 part-time staff who each work 50%, and 50% of that time is spent on EUTR = 2.5 FTE

10.2

\*7 What was the total annual budget for EUTR implementation and enforcement over the reporting period (e.g. travel costs, workshop costs, costs for sample analysis, costs for issuing penalties, legal fees etc., but excluding staff salary costs)?

61396

EUR

8 It is assumed that the implementation of the EUTR in relation to traders and monitoring organisations is included in the above. If this is not correct, please clarify this here:

## Resource-intensive compliance verification for certain Non-Voluntary Partnership Agreement countries (non-VPA countries)

13 For particularly resource intensive compliance verification of operators placing imported timber/timber products on the market, which are linked to the Non-VPA country of harvest or origin, from which the operator imported them, please indicate the name of the country/ies and the reason(s) for the particular resource intensity:

	Country/ies of harvest or origin	Reason(s) for complexity (e.g. complex applicable legislation on country of harvest; language; documents not reliable due to corruption; processing country with no/low traceability to country of harvest)
1	China	Reason(s) for complexity (e.g. complex applicable legislation on country of harvest; language; documents not reliable due to corruption; processing country with no/low traceability to country of harvest) Complejidad del idioma, cadena de suministro y nivel de riesgo del país.
2	Brasil	Complejidad cadena suministro, complejidad normativa, documentos poco confiables.

## II.III. Países con acuerdos de asociación voluntaria (AAV)

Los campos marcados con \* son obligatorios.

### II. Verificación del cumplimiento: Contexto e implementación

#### II.III. Países con acuerdos de asociación voluntaria FLEGT. Contribución de acuerdos de asociación voluntaria FLEGT a los objetivos del EUTR (véase el artículo 3 y el artículo 20, apartado 2, del EUTR)

Este capítulo recoge información sobre si los procesos de acuerdos de asociación voluntaria FLEGT que conducen a la conclusión y al funcionamiento de acuerdos de asociación voluntarios tienen efectos beneficiosos en la aplicación y la ejecución del EUTR, por ejemplo, porque el acceso a la información sobre la legislación aplicable, su aplicación y cumplimiento, y las cadenas de suministro en estos países, es más transparente en el curso de las negociaciones y la aplicación de las definiciones de legalidad y de los sistemas de garantía de la legalidad de la madera de los acuerdos de asociación voluntaria. Esto se traduciría en una menor complejidad de los controles. Otro aspecto importante es si hay pruebas de que el comercio ilegal procedente de estos países está disminuyendo, lo que se refleja en una reducción del riesgo percibido de que la madera y los productos derivados originarios de estos países se aprovechen ilegalmente a lo largo del tiempo. La información pertinente también se recoge en otras secciones del informe nacional y se tendrá en cuenta durante el análisis.

3 Observaciones:

En la pregunta 1 hay que matizar que el Plan Nacional de control de la legalidad de la madera comercializada establece el nivel de riesgo en función del IPC (Índice de Percepción de la Corrupción) del país, no de si tiene un AVA establecido o no. Asimismo, en la pregunta 2, recomendamos que las respuestas se consideren con el debido cuidado al hacer el análisis a nivel europeo, ya que la complejidad de los controles no depende sólo del país exportador, y un análisis simplificado podría dar nociones erróneas del funcionamiento de los AVA.

### II. Verification of compliance - context and implementation

---

#### II.V. Planning –identification of the duty holders (ref. EUTR Article 10 and EUTR Article 8 (4))

In view of the great number of operators placing timber/timber products on the market, the EUTR underlines the need of effective planning. Before establishing a check plan, the Competent authorities need to estimate, how many operators placing domestic and/or imported timber/products on the market and know, how many monitoring organisations are active in their country.

#### Estimation of the number of operators

---

\*1 In your estimate of the total number of operators, does the Competent authority differentiate between operators placing domestic and imported timber on the market?

Yes  No

\*2 Please provide an estimate of the number of operators who have been placing **domestic** timber/timber products on the market over the reporting period:

Operators within the meaning of the EUTR are natural or legal persons that place timber or timber products on the internal market in the course of a commercial activity for the first time (Article 2 of the EUTR). For timber harvested in the internal market, an entity becomes an operator when it harvests the timber for distribution or use through its own business. ([Guidance document for the EU Timber Regulation of 12 February 2016](#), pp. 3 and 18f.). Data on forest owners and entities, which have acquired the right to harvest standing trees, and which actually harvested timber for their own commercial purposes in a given year may not be readily available in all Member States. It is therefore acceptable to use available data, e.g. on forest owners or timber harvesting companies as a proxy. However, these data should not be 'corrected' ex ante by excluding from the number of potential operators some that are unlikely to be commercially active, e.g., natural persons.

1349

\*3 Specify the basis of the estimated number of operators placing **domestic** timber/timber products on the market:

- Number of registered forest owners
- Number of registered logging companies
- Number of domestic operators in a register established to implement the EUTR
- Number of all operators in a register established to implement the EUTR (no differentiation)
- other

4 Please specify other:

5 Please provide an estimate of the number of operators placing **imported** timber/timber products on the market over the reporting period:

Operators within the meaning of the EUTR are natural or legal persons that place timber or timber products on the internal market in the course of a commercial activity for the first time (Article 2 of the EUTR). For timber harvested outside the EU, an entity becomes an operator when it imports timber or timber products into the EU. ([Guidance document for the EU Timber Regulation of 12 February 2016](#), p. 3). Data on importers importing in the course of commercial activity may not be readily available in all Member States. For the purposes of reporting and to ensure comparability, where the exact number of importing operators cannot be established, please base your estimation on the total number of importers of timber and timber products covered by the EUTR as a proxy, independent of the company size or the amount imported per year, or whether the importer is a natural person or not.

27682

\*6 Specify the basis of the estimated number of operators placing **imported** timber/timber products on the market:

- Number of importers of timber or timber products covered by the EUTR according to customs data
- Number of importing operators in a register established to implement the EUTR

\*8 Please provide an estimate of the number of operators placing **undifferentiated** timber/timber products on the market over the reporting period:

## II.VI. Planning - Risk-based approach

Fields marked with \* need to be filled in before the form can be submitted to the next level.

### II. Verification of compliance - context and implementation

---

#### II.VI. Planning - Risk-based approach for planning of checks on operators (ref. EUTR Article 10)

The criteria used in the risk-based planning determine the efficiency and effectiveness of the identification of operators meeting one or more risk criteria. Operators fulfilling one or more criteria are considered at risk of breaching the EUTR. For the establishment of the check plan, the Competent authority needs to dispose of additional criteria for identifying the operators to be included in the actual check plan. The better these criteria serve to identify those operators with the highest risk of non-compliance, the higher are the chances that the Competent authority can take measures to prevent that timber with a non-negligible risk of having been illegally harvest or products derived therefrom are placed on the market, and if necessary, to impose effective, dissuasive, and proportionate penalties.

1 What is the basis for the establishment of the risk based planning at the national level?

	EUTR Art. 10	National law/Regulation/Circular	Other
* Operators - domestic timber/ timber products	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
* Operators - imported timber/ timber products	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

2 Please specify other:

Los establecidos en el Plan Nacional de control de la legalidad de la madera comercializada, el ultimo aprobado en el año 2022; y los establecidos en los Programas Regionales de Control, que desarrolla cada comunidad autónoma.

\* 3 For the risk-based planning, the Competent authority differentiates between operators placing domestic timber /timber products or imported timber/products on the market:

Yes  No

\* 4 Which **criteria are used in the preparation of the risk based planning** of checks of operators placing **domestic** timber /timber products on the market, to identify those for which there is a risk of breaching the EUTR? Select all that apply:

- Operator with antecedents (e.g. prior breaches of the EUTR or other wood/wildlife trade laws, applicable forest laws, accounting, tax, social security, or customs laws)
- Type of timber product (e.g. fuel wood)
- Type of business (e.g. forest owner, timber mill)
- Area/Region of harvest (e.g. areas/regions subject to high levels of corruption or illegal logging)
- Type of forest of harvest (e.g. primary/natural forest, Natura 2000 or national nature protected area, biosphere park)
- Timber types (e.g. broad leaf) or species (e.g. oak)
- Size of forest property of harvest
- High volume/weight of timber/timber products placed on the market
- High value of timber/timber products placed on the market

- Unusual value/volume ratio of timber/timber products placed on the market

\*6 Which **criteria are used in the preparation of the risk based planning** of checks of operators placing **imported** timber/timber products on the market, to identify those for which there is a risk of breaching the EUTR? Select all that apply:

- Operator with antecedents (e.g. prior breaches of the EUTR or other wood/wildlife trade laws, applicable forest laws, accounting, tax, social security, or customs laws)
- Type of timber product (e.g. composite wood)
- Type of business (e.g. builder's merchant, boatyard)
- Country of harvest (e.g. countries with high corruption, internal armed conflicts, track record of illegal logging, export bans)
- Area/Region of harvest (e.g. areas/regions with high corruption, internal armed conflicts, a track record of illegal logging)
- Type of forest of harvest (e.g. primary/natural forest, national nature protected area, biosphere park)
- Timber types (e.g. tropical, broad leaf) or species (e.g. teak)
- Complexity or type of supply chain (e.g. trade involving transit or processing countries)
- High volume/weight of timber/timber products placed on the market

\*10 After having identified the operators placing **imported, domestic or unspecified** timber/timber products on the market which fulfill one or more risk criteria, which of the following **criteria** are used **to prioritize the operators to be included in the inspection/check plan**? Select all that apply:

- Checks carried over from the prior reporting period
- Substantiated concerns
- Number of risk criteria fulfilled (the higher the number, the higher the priority)
- Ranking specific risk criteria higher than others (e.g. antecedents are considered more risky than harvest of a risk species)
- Using one criterion, to choose among operators, where the risks are considered equivalent (weighting)
- Geographic proximity to other operators to be checked
- Random choice among those fulfilling one or several risk criteria

## II.VII Checks planned and performed in the reporting period

Fields marked with \* need to be filled in before the form can be submitted to the next level.

### II. Verification of compliance - context and implementation

---

#### II.VII Checks planned and performed in the reporting period

The Enforcement of the EUTR, i.e. taking the effective, dissuasive and proportionate measures against the different duty-holders (operators, traders and monitoring organisations) is only possible, when compliance is verified by the authorities. For operators, the efficiency of compliance verification is supported by the risk based planning of checks. Information on the operators identified as fulfilling one or more risk criteria and thus being at risk of breaching the EUTR and the operators planned to be checked allows to appreciate the challenge faced in relation to the resources and expertise needed and available. The relationship of operators planned to be checked versus operators checked and checks performed informs on possible complications, which cannot be planned, such as substantiated concerns, issues with accessing the premises or documentation needed, or complications like the need to carry out scientific testing. The type of checks performed and the declared countries of origin and types or timber/timber products provide valuable additional information for a better understanding the size and complexity of the compliance verification task.

*The insertion of the number zero (0) in reply to any of the questions in this Tab requires an explanation in the Comment box.*

*For countries, which do not distinguish between operators placing domestic or imported timber on the market, '0' should be introduced in questions 1. and 2. and the combined numbers should be introduced under questions 3. and 4.*

- \*1 How many of the estimated operators placing **domestic** timber/timber products on the market were identified as fulfilling one or more risk criteria and thus considered **at risk of having breached the EUTR**?

0

- \*2 How many of these operators were **planned to be checked** under the EUTR?

28

- \*3 How many of the estimated operators placing **imported** timber/timber products on the market were identified as fulfilling one or more risk criteria and thus considered **at risk of having breached the EUTR**?

0

- \*4 How many of these operators were **planned to be checked** under the EUTR?

200

- \*5 How many **traders** of timber/timber products were planned to be **checked** under the EUTR?

31

\*6 How many **monitoring organisations** were **planned to be checked**?

0

## Operators - domestic timber/ timber products

7 Were any **checks based on the EUTR performed** on operators placing **domestic** timber/timber products on the market?

Yes  No

\*8 How many operators placing domestic timber/timber products on the market were checked?

36

\*9 How many separate checks (check cases) does this correspond to?

One check (check case) may consist of desk-based work and several onsite visits. For one operator there may be several check cases, e.g. if a check case was closed, but a new concern arises.

36

\*10 How many of the checks (check cases) remain open?

0

\*11 How many checks (check cases) were based on substantiated concerns?

1

\*12 For how many checks (check cases) were there any issues accessing premises or documentation?

0

13 How many checks (check cases) were purely desk-based?

This serves to estimate the workload involved.

20

14 How many checks (check cases) were both desk-based and onsite?

This serves to estimate the workload involved.

16

## Operators – imported timber/timber products

\*15 How many operators placing imported timber/timber products on the market were checked?

92

\*16 How many separate checks (check cases) does this correspond to?

One check (check case) may consist of multiple desk-based document reviews and several onsite visits, which may include multiple sample takings.

96

\*17 How many of the checks (check cases) remain open?

0

\*18 How many checks (check cases) were based on substantiated concerns?

1

\*19 For how many checks (check cases) were there any issues accessing premises or documentation?

20 How many checks (check cases) were purely desk-based?

This serves to estimate the workload involved.

23

21 How many checks (check cases) were both desk-based and onsite?

This serves to estimate the workload involved.

73

\*22 For how many checks (check cases) was scientific testing used?

2

\*23 For how many of these checks (check cases) were mismatches found compared to the declared information?

2

\*24 Did the Competent authority record, by check (check case), the declared country/countries of harvest/origin of the timber/timber products on which the check (check case) focused?

Yes  No

25 Please specify how many of the checks (check cases) primarily focused on one of the below declared countries of harvest/origin of timber/timber products:

The list contains the countries with which the EU concluded Voluntary Partnership Agreements and/or regarding which Competent authorities expressed a particular interest. It also provides 'other' for other single-country of harvest/origin products the check (check case) focused on, 'multiple focus countries' for checks focusing on several countries of harvest /origin (e.g. products of mixed origin), and 'no focus country/ies', where checks (check cases) did not focus on a specific country or countries

\*26 Did the Competent authority record, by check (check case), the types of timber/timber product (HS Code /denomination) checked?

Yes  No

\*27 Please select the main HS codes which were subject to checks (check cases):

- 4401** Fuel wood, in logs, in billets, in twigs, in faggots or in similar forms; wood in chips or particles; sawdust and wood waste and scrap, whether or not agglomerated in logs, briquettes, pellets or similar forms
- 4403** Wood in the rough, whether or not stripped of bark or sapwood, or roughly squared
- 4406** Railway or tramway sleepers (cross-ties) of wood
- 4407** Wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6 mm
- 4408** Sheets for veneering (including those obtained by slicing laminated wood), for plywood or for other similar laminated wood and other wood, sawn lengthwise, sliced or peeled, whether or not planed, sanded, spliced or end-jointed, of a thickness not exceeding 6 mm
- 4409** Wood (including strips and friezes for parquet flooring, not assembled) continuously shaped (tongued, grooved, rebated, chamfered, V-jointed, beaded, moulded, rounded or the like) along any of its edges, ends or faces, whether or not planed, sanded or end-jointed
- 4410** Particle board, oriented strand board (OSB) and similar board (for example, waferboard) of wood or other ligneous materials, whether or not agglomerated with resins or other organic binding substances
- 4411** Fibreboard of wood or other ligneous materials, whether or not bonded with resins or other organic substances
- 4412** Plywood, veneered panels and similar laminated wood
- 4413 00 00** Densified wood, in blocks, plates, strips or profile shapes
- 4414 00** Wooden frames for paintings, photographs, mirrors or similar objects
- 4415** Packing cases, boxes, crates, drums and similar packings, of wood; cable-drums of wood; pallets, box pallets and other load boards, of wood; pallet collars of wood (Not packing material used exclusively as packing material to support, protect or carry another product placed on the market.)
- 4416 00 00** Casks, barrels, vats, tubs and other coopers' products and parts thereof, of wood, including staves
- 4418** Builders' joinery and carpentry of wood, including cellular wood panels, assembled flooring panels, shingles and shakes
- Chapters 47 and 48** Pulp and paper of the Combined Nomenclature, with the exception of bamboo-based and recovered (waste and scrap) products
- 9403 30** Wooden furniture
- 9403 40** Wooden furniture
- 9403 50 00** Wooden furniture

## III.I Remedial actions and immediate interim measures

Fields marked with \* need to be filled in before the form can be submitted to the next level.

### III. Enforcement - context and implementation

#### III.I Remedial actions and immediate interim measures (ref. EUTR Article 10(5))

The enforcement of the EUTR requires Member States to put in place national measures which provide a robust framework to be able to take effective, dissuasive and proportionate enforcement action and sanction different duty-holders (operators, traders and monitoring organisations) for infringements of the Regulation. The information on the legal frameworks used, the range of potential national penalties and their uppermost levels provide valuable information to assess the consistency of potential enforcement actions across the EU. This section is structured by duty-holders' obligations under the EUTR (prohibition to place illegal timber on the market for operators; due diligence and reporting obligations for operators and monitoring organisations; traceability for traders, and reporting obligation for monitoring organisations) and the provisions for remedial actions or similar and immediate interim measures, which are applicable in case of or to prevent infringements to each obligation.

1 Please specify for which breaches of the EUTR Notices of remedial actions or similar measures, and Immediate Interim Measures (ref. EUTR Article 10(5)) can be applied in your country:

	Notice of remedial action in cases of breaches of:	Other national measures which are similar to Notices of remedial action in cases of breaches of:	Immediate interim measures [1] in cases of breaches of:
