

Big city dwellers have a certain sense of distance from the natural world, but...

DOES NATURE DEPEND ON US  
... OR DO WE DEPEND ON IT?

# bio- diver- sity

- The **WATER** that comes out of our faucets still comes **FROM RIVERS OR AQUIFERS**

- The food on supermarket shelves continues to be **GROWN IN FIELDS**

- Many active ingredients of **MEDICINES** come, even today, from wild plants

- Nature is our best model. Most inventions that make our lives easier, such as Velcro and radar, were **INSPIRED BY FLORA AND FAUNA**

- So, by taking care of biodiversity we are **TAKING CARE OF OUR OWN WELL-BEING**

**JOIN AND  
PUSH FOR  
CHANGE!**
